

Super Energy Efficient

Developed for the homeowner that wants a super energy efficient, high R value wall, Country Autumn Log Homes has it. Using a structural insulated panel with a styrofoam core you can have an R rating of 17, 25 or 36. Flexibility is the word here. Use our exterior log siding, with full corners, then you have a choice of interior finishes; interior log siding for the log look, knotty pine in a herringbone pattern, drywall or whatever you, the homeowner, would choose.
